

# Spelfabet Level 1

## Moveable Alphabet sequences

### Objective:

The learner will correctly discriminate the difference between two and three-sound words which only differ by one sound (minimal pairs) and change the relevant grapheme (spelling) to correctly spell the new word. Occasionally, only the order of letters will need to be changed e.g. making "top" into "pot".

This activity helps develop learners' phonemic awareness (segmenting, phoneme manipulation) as well as their orthographic knowledge (phoneme-grapheme correspondences, usual location of each grapheme in words/syllables, which graphemes go together). It follows the same sequence as the Spelfabet Workbook 1 version 2.

### What to do:

Print, laminate and cut up your Spelfabet Moveable Alphabet. You just need the one-letter orange pieces (vowels) for this Level 1 activity, so can save cutting up the rest for later.

Start with just the spellings listed above the first table on the next page.

Throughout this activity, say sounds (phonemes) not letter names. Make sure you're not using your voice when saying voiceless consonants (p, t, k, th as in thin, f, s, sh, ch, h).

Make the first word in the table with the relevant letters and read it slowly, stretching it out and running your finger along it so you're pointing to each spelling as you say the relevant sound. Put the word in a sentence or two to illustrate its meaning(s), using the example sentence if you can't think of a better one.

As you add more spellings, arrange them in an arc in colour groupings on the table, with green on your learner's left, yellow and orange in front of them, and red on your learner's right. If your learner is struggling to find the correct piece, give a colour clue to help narrow down the search e.g. "Use a red one".

At the end of each set of words, add the next set's spelling(s), so you gradually accumulate more spellings over time. If you're also doing Workbook 1, each set of words in the workbook should be done with the matching set of words here.

The spellings' colours are based on a traffic light:

- Green is generally for word beginnings (go)
- Orange is generally for word middles (vowels)
- Red is generally for word endings (stop)

Yellow letters can be used at word beginnings or endings.

Spellings needed: a, d, d, o, p, p, t, t (use with Workbook 1 p1-4).

ad	There was an ad on TV.
at	We are at home/school.
pat	Pat the dog or pat the cat.
