

# Spelfabet movable alphabet

## Level 2 sequences

Here are some sequences of four-sound words (CVCCs) that you can make with your movable alphabet, to show a learner how to build and change words, and learn about consonant spellings which tend to go together at word endings.

Don't say letter *names* when using this alphabet. Instead say the *sounds* that each letter/spelling represents in the word(s) you're using. Make sure you use the two or three-letter spellings for single sounds represented by digraphs like "ch", "sh" and "th" and "ve" and trigraphs like "tch" and "dge". If learners make "ch" out of "c" and "h" just replace these letters with the "ch" spelling and say "this one is ch".

Use the alphabet to make a word then tell your learner a word that's one sound different, and ask them to change the original word into the new word by changing one spelling. Their job is to hear where the change is, find the spelling that needs to change, and replace it with the correct new spelling.

### Example sentences

An example sentence or two is provided for each word in the sequences below, to make the activity more meaningful, and help build vocabulary. If you can think of better sentences, especially funny ones, great, use your own, and just use my sentences if you can't think of better ones. Your learners may also be able to think of sentences. Make sure you discuss any words they don't know

If working in pairs or groups, ask whoever isn't manipulating the alphabet to do the word-building to write the words being built down. At the end of the activity they might then like to make up a silly story using the words they've written, for extra reading practice, and a laugh.

### Use the orange letters a, e, i, o, u and the yellow and green spellings, plus the red "ve"

Make the word "fifth" and ask your learner(s) to read it, then say:

1. Well done, that's "fifth", as in "I came fifth in the race". Please change it into "filth" as in "please wash that filth off your hands, they're filthy".

## The Last Word

Now try playing a game in which you create a word then take turns to change a single spelling in it to make a new word, using the spellings you’ve learnt so far. Use only one orange spelling at a time. No repetition of words is allowed. The winner is the person who makes the last word.
